

Stand Alone Wall Armor

PROTECTION AGAINST BLAST AND BALLISTIC THREATS

Fiber reinforced polymer composite

Up to 35 meters per hour installation time by 4 people

Stand Alone Wall Armor

The Stand Alone Wall Armor is an innovative solution that ensures the safety of soldiers from blast and ballistic threats. The design is composed of state of the art panel armor technology strategically placed for optimum safety and protection.

Key Advantages

- Rapidly deployable
- Blast and Ballistic protection
- Lightweight
- Multi-levels of protection
- Cost effective
- Easy to install
- Easy to transport
- Very durable
- Mobile

Applications

Compotech Stand Alone Wall Armor is an ideal defensive solution for vulnerable:

Military Base Camp Protection

- Tents protection
- Containers protection
- Checkpoints protection

Building Security

- Government buildings
- Embassies, Consulates
- Hotels, Hospitals

Infrastructure Security

- Protection of vulnerable Industrial parks
- Protection of vulnerable oil fields refineries

Technical Specifications

Stand Alone Wall Armor: Competitive solution

Military Base Protection Systems	 Sandbags	 T-Walls	 Stand Alone Wall
Fast deployment (35m/hour) per 4persons	NO	NO	YES
Simple Installation	YES	NO	YES
Easy redeployment	NO	NO	YES
Roof protection	NO	NO	Optional
Space Optimization	NO	NO	YES
Environmental durability	NO	YES	YES
Turnkey solution	NO	NO	YES
Transportation method	Ground	Ground	Ground Air & Sea
Weight per surface area (Kg/m ²)	Heavy >300	Heavy >500	Light < 25

Turn Key Solution

- Compact Shipping
- 1.5m x 2.5m x 0.5m shipping box
- Less than 1000 kg per box
- Unlimited shelf time
- Storage friendly
- Easy to transport
