

Modular Ballistic Protection System

PROTECTION AGAINST BLAST AND BALLISTIC THREATS

MBPS TENT INTEGRATION

RAPID INSTALLATION – 30 MIN BY 4 PERSONNEL

Modular Ballistic Protection System

In war zones, when soldiers take off their vests and helmets for resting, they are often unprotected from mortars and bullets. The modular ballistic protection system uses state of the art ballistic panel technology to transform vulnerable tents into fortified shelters where soldiers can work, eat and rest safely.

Key Advantages

- Rapidly deployable
- Lightweight
- Cost effective
- Easy to transport
- Mobile
- Blast and Ballistic protection
- Multi-levels of protection
- Easy to install (< 30 min/ 4 persons)
- Minimal visual signature
- Very durable

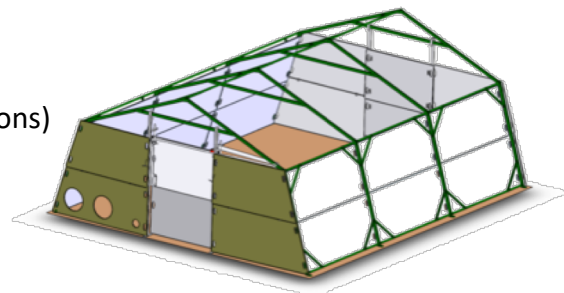

Applications

Aid Missions

Disaster Relief

Temporary Hospitals

Military Base Camp Protection

Modular Ballistic Protection System (MBPS)

Military Tent: Competitive solution

Military Base Protection Systems			
	Sandbags	T-Walls	MBPS
